August 2026

DISCLAIMER

FORWARD-LOOKING INFORMATION ("FLI")

This presentation contains FLI within the meaning of applicable Canadian securities legislation regarding future events or the future performance of Itafos Inc. and its subsidiaries (collectively, the "Company"). Except for statements of historical fact relating to the Company, information contained herein may constitute FLI. Generally, FLI can be identified by the use of forward looking terminology such as "plans", "expects", "is expected", "estimates", "intends", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". FLI in this presentation includes, but is not limited to, statements with respect to: industry dynamics and outlook; economic factors; market prices; the life of mine of the Company's assets, including expanding the mine life of Conda beyond 2037; the potential for additional mineral resources; the future demand for and production of P2O5 (phosphorous pentoxide); future investments in P2O5 projects; global capacity, production and operating rates; the timing and costs of future P2O5 projects; and the timing and cost of the H1/NDR mine development project. The FLI contained in this presentation is based on the opinions, assumptions and estimates of management some of which are set out herein, which management believes are reasonable as at the date the statements are made. Those opinions, assumptions and estimates are inherently subject to a variety of risks and uncertainties and other known and unknown factors that could cause actual events or results to differ materially from those projected in the FLI. These include the Company's expectations and assumptions with respect to the following: commodity prices; operating results; safety; changes to the Company's mineral reserves and resources; timing of expected permitting; optionality for further mine life extension through ownership of the H2/Freeman Ridge leases and potential third party mineral purchase agreements; changes to mine development and completion; foreign operations; changes to regulation; environmental risks; the impact of adverse weather and climate change; general economic changes, including inflation and foreign exchange rates; the actions of the Company's competitors and counterparties; financing, liquidity, credit and capital risks; the loss of key personnel; impairment risks; cybersecurity risks; transportation and infrastructure; changes to equipment and suppliers; adverse litigation; changes to permitting and licensing; loss of land title and access rights; changes to insurance and uninsured risks; the potential for malicious acts; market volatility; changes to technology; changes to tax laws; the risk of operating in foreign jurisdictions; and the risks posed by a controlling shareholder and other conflicts of interest. Although the Company has attempted to identify crucial factors that could cause actual actions, events or results to differ materially from those described in FLI, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that FLI will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. The reader is cautioned not to place undue reliance on FLI. The Company undertakes no obligation to update forward-looking statements if circumstances or management's estimates, assumptions or opinions should change, except as required by applicable securities law. Risks and uncertainties affecting the FLI contained in this presentation are described in greater detail in the Company's current Annual Information Form and current Management's Discussion and Analysis ("MD&A") available under the Company's profile on SEDAR+ at www.sedarplus.ca and on the Company's website at www.itafos.com.

This presentation also contains future oriented financial information and financial outlook information (together, "FOFI") about the Company's prospective results of operations. FOFI is subject to the same assumptions, risk factors, limitations and qualifications as set forth in the above paragraph. The Company has included the FOFI to provide an outlook of management's expectations regarding anticipated activities and results, and such information may not be appropriate for other purposes. The Company believes that the FOFI has been prepared on a reasonable basis, reflecting management's reasonable estimates and judgements; however, actual results of operations and the resulting financial results may vary from the amounts set forth herein. Any financial outlook information speaks only as of the date on which it is made and the Company undertakes no obligation to publicly update or revise any FOFI except as required by applicable securities laws.

INTERNATIONAL FINANCIAL REPORTING STANDARDS ("IFRS") AND NON-IFRS MEASURES

The Company prepares its financial statements in accordance with IFRS as issued by the International Accounting Standards Board. IFRS differs in certain respects from US generally accepted accounting principles ("US GAAP"). Therefore, financial information presented herein may not be directly comparable to similar information presented by companies that prepare their financial statements in accordance with US GAAP. This presentation contains both IFRS and certain non-IFRS measures that management considers to evaluate the Company's operational and financial performance. Non-IFRS measures are a numerical measure of a company's performance, that either include or exclude amounts that are not normally included or excluded from the most directly comparable IFRS measures. Management believes that the non-IFRS measures provide useful supplemental information to investors, analysts, lenders and others. In evaluating non-IFRS measures, investors, analysts, lenders and others should consider that non-IFRS measures do not have any standardized meaning under IFRS and that the methodology applied by the Company in calculating such non-IFRS measures may differ among companies and analysts. Non-IFRS measures should not be considered as a substitute for, nor superior to, measures of financial performance prepared in accordance with IFRS. The non-IFRS measures included in this presentation are as follows: adjusted EBITDA (Net income (loss) and operating income (loss)); Adjusted EBITDA margin (adjusted EBITDA and revenues); net leverage ratio (current debt, long-term debt and cash and cash equivalents; net income (loss) and operating income (loss)) for the current and preceding three quarters; free cash flow (cash flows from operating activities and cash flows from investing activities); maintenance capex (additions to property, plant and equipment and mineral properties); and growth capex (additions to property, plant and equipment and mineral properties), liquidity (cash and available revolving loan balance). Definitions and reconciliations of the non-IFRS measures used in this presentation (other than Adjusted EBITDA Margin) are available in Section 8 of the Company's most recent MD&A, which is incorporated by reference herein, and available under the Company's profile on SEDAR+ at www.sedarplus.ca and on the Company's website at www.itafos.com. Additional reconciliations for Adjusted EBITDA Margin are also included in the Appendix to this presentation.

MINERAL RESERVES AND MINERAL RESOURCES

This presentation uses Mineral Reserve and Mineral Resource classification terms that comply with reporting standards set forth in Canadian National Instrument ("NI") 43-101 for all public disclosure of scientific and technical information concerning mineral projects by Canadian registered issuers. NI 43-101 standards differ significantly from standards set forth by the United States Securities and Exchange Commission ("SEC"). Therefore, information regarding mineralization presented herein may not be directly comparable to similar information disclosed by companies in accordance with SEC standards. For instance, Mineral Reserve estimates contained in this presentation may not qualify as "reserves" under SEC standards. The reader is cautioned not to assume that any part or all of the Mineral Resources identified as "Mineral Resources," "Measured Mineral Resources," "Indicated Mineral Resources" and "Inferred Mineral Resources" in this presentation will ever be converted into Mineral Reserves as defined in NI 43-101, be upgraded to a higher category, or be economically or legally mineable. The Company's latest respective technical reports are available under the Company's profile on SEDAR+ at www.sedarplus.ca and on the Company's website at www.itafos.com.

QUALIFIED PERSONS

Scientific and technical information contained in this presentation has been reviewed and approved by the following respective qualified persons, as defined by National Instrument 43-101 ("NI 43-101"):

- I. Regarding mineral resources and other scientific and technical information for Conda and Farim is Jerry DeWolfe, Professional Geologist (P.Geo.) with the Association of Professional Engineers and Geoscientists of Alberta. Mr. DeWolfe is a full-time employee of WSP Canada Inc. (WSP, formerly known as Golder Associated Ltd.) and is independent of the Company.
- II. Regarding mineral reserves for Conda and Farim is Terry Kremmel, Professional Engineer (P.E.) licensed by the State of Missouri and North Carolina. Mr. Kremmel is a full-time employee of WSP USA, Inc. and is independent of the Company.
- III. Regarding mineral resources for Arraias is Jennifer Simper, Professional Geologist (P.Geo.) with the Association of Professional Engineers and Geoscientists of Alberta. Mrs. Simper is a full-time employee of WSP Canada Inc. (WSP; formerly known as Golder Associated Ltd.) and is independent of the Company.
- IV. Regarding mineral resources for Santana is Carlos Guzmán, FAusIMM (229036), Mining Engineer, RM (Chilean Mining Commission). Mr. Guzmán is a full-time employee of NCL Brasil Engenharia Ltda. and is independent of the Company.

The Company's latest technical reports are as follows, which are each available under the Company's website at www.itafos.com and under the Company's profile on SEDAR+ at www.sedarplus.ca:

- Conda – the technical report titled "NI 43-101 Technical Report Itafos Conda Project Idaho, USA" with an effective date of July 1, 2023 (the "Conda Technical Report");
- Arraias – the technical report titled "NI 43-101 Technical Report Preliminary Economic Assessment Arraias Phosphate Operations, Tocantins, Brazil" with an effective date of January 30, 2026 ("the Arraias Technical Report");
- Farim – the technical report titled "Farim Phosphate Project NI 43-101 Technical Report and Feasibility Study" with an effective date of May 17, 2023 (the "Farim Technical Report"); and
- Santana – the technical report titled "Feasibility Study (FS) Santana Phosphate Project, Pará State, Brazil" with an effective date of October 28, 2013 ("the Santana Technical Report");

Additional information regarding Conda and Arraias, including information regarding data verification, key assumptions, parameters and methods used to estimate mineral reserves and mineral resources and the risks that could materially affect the development of the mineral reserves and mineral resources required by NI 43-101 can be found in the Conda Technical Report and the Arraias Technical Report.

THIRD PARTY SOURCES

This presentation includes market and industry data which was obtained from various publicly available sources and other sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third party sources referred to in this presentation, or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company does not make any representation as to the accuracy of such information.

OTHER

This presentation includes measurements expressed in metric tonnes. All financial figures reflected in United States Dollars (USD). The information presented herein was approved by management of the Company on August 13, 2026.

OUR BUSINESS

A pure-play phosphate and specialty fertilizer company.

OUR PURPOSE

Our purpose is to feed a growing world population, nourish planet Earth's soil, and contribute to human nutrition.

CONDA

(flagship vertically integrated phosphate fertilizer production)

SANTANA

(phosphate mine project)

FARIM

(phosphate mine project)

ARRAIAS

(vertically integrated phosphate fertilizer production)

Itafos' seasoned management team is focused on creating long-term shareholder value and closing the valuation gap to its peers

OPERATIONAL EXCELLENCE

- Safety is the first priority
- High utilization rates drive operating margins
- Solid balance sheet and liquidity funds capital needs

STRONG MARKET FUNDAMENTALS

- Incremental supply is difficult and costly to bring online
- Demand is steadily increasing, bolstered by new downstream markets

VALUE CREATION

- Diligently maintain assets to drive performance
- Proactively invest in projects to increase resources and generate long-term value

OPERATIONAL EXCELLENCE

Top-tier execution that drives best in class operating margins

Utilization⁽¹⁾

Adjusted EBITDA Margin⁽²⁾

OPERATIONAL EXCELLENCE

Balance Sheet is cornerstone of solid foundation

Net Debt and Leverage Ratio⁽¹⁾

Liquidity⁽¹⁾ Profile

STRONG MARKET FUNDAMENTALS

Structurally tight supply and demand balances are likely to persist for the next decade

Short-term Supply Challenges

- No new Phosphoric Acid capacity additions likely until 2028
- Chinese exports continue to decline with increasing government restrictions

Long-term Outlook Implies Historically High Utilization

- Likely Phos Acid net capacity additions projected to be in-line with expected demand increases

VALUE CREATION

Supporting US farmers with continuous supply of phosphate fertilizer by investing in our operations

Investment at Conda to Improve Assets¹,

Maximize Fertilizer Production², and

Extended Operating Runway

Husky 1 / North Dry Ridge ("H1/NDR") supports Conda mine life to 2037⁽³⁾

\$126 Million Capital Spend

MgO Reduction project maintains production rates and improves product optionality

\$95 - 110 Million Est. Capital Spend

Continuous exploration drilling identifies resources to increase mine life

\$8 Million Annual Est. Capital Spend

VALUATION GAP

Itafos trades at a significant multiple discount to peers

EV / 2027E Adj. EBITDA Multiple vs. Peers⁽¹⁾

OUR ASSETS

ITAFOS

CONDA: Flagship Business

Vertically integrated
phosphate fertilizer business

- Situated in Idaho, a mining-friendly jurisdiction
- Strategic location offers multiple options to deliver P_2O_5 value to North America fertilizer markets
- H1/NDR extends current mine life to 2037

CONDA: Workhorse Asset

Industry-leading operations supported by long-term offtake and supply agreements

Record Setting, Consistent Production

- Itafos P₂O₅ production record in FY2025
- Ratable offtake minimizes working capital investment

Adjusted EBITDA⁽¹⁾ Engine

- Funds internal capital requirements
- Foundation of balance sheet strength

Long-term Agreements Mitigate Volatility

J. R. Simplot purchases 100% of MAP produced by Conda on a rolling 3-month average price indexed to NOLA

~60% of sulfuric acid needs are covered under a long-term supply contract with Rio Tinto that is based on Tampa sulfur index prices and helps to stabilize the operations of each company

All ammonia needs sourced from Canada and indexed off the AECO natural gas price

CONDA: Husky 1 / North Dry Ridge

Expanding mine life through 2037, ensuring stable ore supply for fertilizer production

RECENT MILESTONES:

- NDR mining commenced in 2024
- Mechanical completion of H1/NDR project in 2025
- First ore from new mine delivered to plant in 2025

MAGNESIUM REDUCTION PROJECT:

- Upgraded floatation circuit at front-end of plant
- Addition will allow facility to maintain total nameplate production capacity and add optionality for SPA production
- Represents the majority of Conda growth CAPEX⁽¹⁾ through 2028
- Project tie-in scheduled during long turnaround at plant during 2028

CONDA: Beyond H1/NDR

Accelerating exploration of leases adjacent to currently permitted reserves to increase mine life beyond 2037

1 DRY RIDGE EXTENSION

- 30+ reverse circulation and core holes totaling over 13,000 feet planned to be drilled in 2026
- Commencing environmental studies and preparing geologic models in support of a future, updated NI 43-101

2 FREEMAN RIDGE & HUSKY 2

- Continuing environmental baseline studies in 2026
- Targeting exploration drilling to begin in 2027

ARRAIAS: Solutions for Domestic Market

Vertically integrated business producing phosphate fertilizer and specialty products

Strategically located in Tocantins, Brazil, one of the world's fastest growing fertilizer markets

Plant restart commenced in 2022 facilitating sales of new products to local farmers

ARRAIAS: Fertilizer Restart Fuels Growth

Phased restart of plant and introduction of new products initiates operations turnaround

Production Optionality

- Dry fertilizer products have been well received in local markets
- Baseload sulfuric acid capacity backed by long-term offtake agreements

Positive EBITDA Momentum

- Re-start of sulfuric acid plant generated positive adjusted EBITDA⁽¹⁾
- Updated PEA⁽²⁾ supports capital program to restart SSP production

ARRAIAS: Return to SSP Creates Value

Updated PEA measures ore quality and quantities to support plant upgrades

Updated Preliminary Economic Assessment of Arraias Phosphate Project completed in early 2026

Higher-grade ore identified that supports plant upgrade and new product introduction

14-YEAR

Mine Life

\$8M

Incremental CAPEX

SSP production expected to commence in 2027

Adjusted EBITDA⁽¹⁾ Ranges (\$MM per year)

- Addressed historical issues
- Made improvements to facility and operations
- Identified options to create long-term value

DEVELOPMENT ASSETS: High-Grading Portfolio

Working to find means to supply high quality product to global customers while delivering value to shareholders

FARIM, GUINEA BISSAU

- Completed NI 43-101 in 2023
- World class undeveloped phosphate rock mine project
- Well-positioned to access global markets
- Commencing drilling program in 2026 and associated engineering to support a low-capital cost, phased development option for the project

FARIM

Products: Phosphate Rock
Capacity: 1.3Mt p.a.

DEVELOPMENT ASSETS: Long-term Optionality

High quality resources in fastest growing agricultural region

SANTANA, BRAZIL

- One of the highest-grade phosphate resources in Brazil with Measured and Indicated mineral resources of 60.4 Mt @12.0% P₂O₅
- Located in Pará, Brazil
- Technical report supports production of SSP with options to sell to blenders or directly to local farmers
- Minimal operating costs incurred to maintain integrity of the concession while evaluating strategic alternatives

APPENDIX

MANAGEMENT TEAM WITH A PROVEN HISTORY OF DELIVERING STAKEHOLDER VALUE

David Delaney

Chief Executive Officer

- Itafos CEO since November 2020
- Oversaw 16 sites as COO & EVP of PotashCorp
- Over 30 years of experience in leadership roles within the fertilizer and agriculture sectors
- Current board member of the International Fertilizer Association and TFI
- Began career in sales at Arcadian Corporation
- Education: BSC in Agriculture, Southern Illinois University

Tim Vedder

VP Operations & GM of Conda

- Conda GM since January 2014
- Over 20 years of experience in operational leadership roles, including 16 years in phosphate production and seven years in semiconductor production
- Education: BSC in Chemical Engineering, Washington State University

Matt O'Neill

Chief Financial Officer

- Itafos CFO since August 2022
- Over 25 years of experience in leadership roles within the finance industry
- Raised over \$7 billion in capital across both U.S. and international markets
- Prior to Itafos, served as CFO at Hawkwood Energy
- Education: B Com, University of Melbourne

Geoff Williams

VP, General Counsel, & Corporate Secretary

- Itafos VP, General Counsel & Corporate Secretary since July 2024
- Over 20 years of large law firm and in-house corporate transactional legal experience
- Over 10 years of experience in senior leadership roles for publicly traded companies (NYSE, Nasdaq, TSX and ASX)
- Significant experience in the mining industry and fertilizer industry
- Education: B.A., International Affairs, University of Colorado at Boulder; J.D., University of Denver, Sturm College of Law

1. Non-IFRS measures; refer to disclaimer, appendix and the Company's MD&A for definitions and reconciliations.

2. MOS definition: "Adjusted EBITDA presented at the segment level is defined as the related segment's operating earnings (loss) plus depreciation, depletion and amortization, plus asset retirement obligation accretion, plus foreign exchange gain (loss), plus other income (expense) plus dividends from equity investments, less earnings (loss) from noncontrolling interests. Adjusted EBITDA is also adjusted for notable items that management excludes in analyzing our performance. We (Mosaic) provide these non-GAAP financial measures because we believe they are relevant and useful to securities analysts, investors and others because they are part of our internal management reporting and planning process, and our management uses these measures to evaluate the operational performance and valuation of our segments. Management also uses these measures as a method of comparing segment, performance with that of its competitors."

3. NTR definition: "EBITDA is calculated as net earnings (loss) before finance costs, income taxes, and depreciation and amortization. (Nutrien) considers adjusted EBITDA to be a meaningful measure because it is not impacted by long-term investment and financing decisions but rather focuses on the performance of our day-to-day operations. In addition, it excludes the impact of impairments and other costs that are centrally managed by our corporate function."

NET DEBT & NET LEVERAGE RATIO RECONCILIATION

MARKET DYNAMICS

ITAFOS

STRONG MARKET FUNDAMENTALS

The global phosphate supply and demand balance is fundamentally tight, supporting product prices and financial results in the short and long-terms

- Supply is constrained by declining traditional resources and new capacity is difficult and costly to bring online
- Demand is steadily increasing with population growth, bolstered by new downstream markets

POSITIVE GLOBAL AGRICULTURAL INDICATORS

- World grain and oilseeds stock to use ratio remains at historically low level
- Increasing acreage planted and improving yields require more fertilizers to replace nutrients in soil

SUPPORTIVE GOVERNMENT POLICIES

- Phosphate added to U.S. critical minerals list in November 2025
- U.S. federal spending programs help farmer balance sheets

PHOSPHATE SUPPLY CONSTRAINED

U.S. production continuing downward trend, step changes in Chinese export supply

U.S. Phosphate Production⁽¹⁾

- Declining phosphate rock supply
- Prohibitive capital cost for incremental projects

Chinese Phosphate Exports⁽²⁾

- Focus on domestic markets
- Shift to non-fertilizer applications

CONSTRUCTIVE LONG-TERM PHOSPHATE FUNDAMENTALS

Global phosphoric acid supply and demand balance is expected to be tight through the decade

Steady Demand Bolstered by Non-Fertilizer Applications

Limited Incremental Supply Forces Elevated Operating Rates

GLOBAL AGRICULTURAL INDICATORS

Fundamental market signals indicate positive long-term trends

World (Less China) Grain and Oilseed Stock:Use Ratio

Brazil Fertilizer Shipments

U.S. CORN CROP STATISTICS

Planted acres expected to decrease in 2026 providing incremental support to prices

USDA Data

Crop Year	2023	2024	2025	2026 F	Projected Change
Area Planted (M Acres)	94.6	90.9	98.8	96.7	-2%
Area Harvested (M Acres)	86.5	83.0	91.3	88.6	-3%
Yield (Bushels / Acre)	177.3	179.3	186.5	180.7	-3%
Production (B Bushels)	15,341	14,892	17,021	16,013	-6%
Exports (B Bushels)	2,255	2,858	3,325	3,275	-2%
BioFuel Use (B Bushels)	5,489	5,436	5,550	5,600	2%
Average Price (\$/Bushel)	\$4.55	\$4.24	\$4.15	\$4.50	8%

Planted and harvested acres expected to decrease, but still well above historical norms

Small declines expected in yields coming off record results in 2025

Continued low pricing hampers fertilizer affordability

U.S. SOYBEAN CROP STATISTICS

Chinese purchase agreement and biofuel growth positively impact prices

USDA Data

Crop Year	2023	2024	2025	2026 F	Projected Change
Area Planted (M Acres)	83.6	87.3	81.2	86.8	7%
Area Harvested (M Acres)	82.3	86.2	80.4	85.8	7%
Yield (Bushels / Acre)	50.6	50.7	53.0	52.7	-1%
Production (B Bushels)	4,162	4,374	4,262	4,519	6%
Exports (B Bushels)	1,700	1,882	1,520	1,660	9%
BioFuel Use (M Pounds)	12,995	11,758	14,550	17,800	22%
Average Price (\$/Bushel)	\$12.40	\$10.00	\$10.40	\$11.40	10%

China has committed to buy 25 million tonnes per year through 2028

Biofuel demand expected to increase meaningfully

Recent prices have moved above forecasted average for the coming crop year

U.S. FISCAL POLICY SUPPORTS FARMERS

Federal aid programs offset fertilizer affordability concerns

U.S. Government Spending

Emergency Farm Aid extended 2018 Farm Bill for one year

Direct government payments forecasted to increase to over \$30 billion in 2025

\$12 billion in one-time price loss coverage payments to be made during 2026 under the Farmer Bridge Assistance Program

PHOSPHATE FERTILIZER PRICES

Underlying market fundamentals and global trade trends support current prices and longer-term forecasts

Trailing 12-Months U.S. MAP and DAP Prices (fob NOLA)

Historical U.S. MAP Prices (fob NOLA)

RAW MATERIAL COSTS

Sulfur prices have spiked well above levels last seen in 2022 and have led to phosphate fertilizer production curtailments in China and Brazil

Sulfur Price (fob Vancouver Spot)

Ammonia Price (cfr Tampa)

IMPACTS OF CONFLICT IN IRAN

Significant percentages of the global trade of sulfur and phosphate has been unable to transit the Strait of Hormuz, creating supply shortages and increasing prices

Sulfur

Phosphates

SULFUR MARKET DYNAMICS

Phosphoric acid primary demand driver, imports expected to increase as share of global market

Demand by Use

Global Trade

SULFUR MARKET PARTICIPANTS

China and Morocco drive demand, bulk of exports originate from Middle East

Import Demand

Export Supply
